

CBE 20260 — Lecture Notes, Spring 2026

Introduction to Chemical Engineering Thermodynamics

Welcome

These are the working notes for **CBE 20260 Introduction to Chemical Engineering Thermodynamics** (Spring 2026).

Use the **Lectures** menu in the navigation bar to jump to individual lecture notes.

The **Notebooks** tab contains Jupyter notebooks that accompany the class materials.

The site will be updated periodically throughout the semester. You can download a pdf of the notes by clicking on the link in the upper right corner of the page.

These materials are meant to accompany the textbook
Fundamentals of Chemical Engineering Thermodynamics by Dahm and Visco.

See the course Canvas site for the syllabus, schedule, and other materials.

If you find errors in the notes, please let me know via email: ed@nd.edu
